

Eric Kursman

Purcellville, VA

As a middle school English teacher in VA, I know that seamlessly infusing digital learning throughout the curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high-speed broadband is the key to allowing modern teaching and learning to occur in all schools across the country. We need to make sure that all students can attend schools with enough bandwidth for students to access internet applications to further their learning. Without high-speed bandwidth, our students are inequitably ill-prepared for the demands of collaborative and transformative learning in our digital society. Technology loses its power if the access to utilizing that technology is not available.
